Product Design (Figma)
UX Research
AI Automation & Workflows
Team Building & hiring
Technical Collaboration
Product Strategy

PROFESSIONAL EXPERIENCES

Kelick September 2024 - October 2025
Product Designer & Manager

- Led full product redesign from concept to MVP, owning end-to-end UX — from user research and wireframing to final UI implementation
- Designed product experience that acquired 5+ paying B2B customers and drove ~$10K MRR, validating design decisions through real revenue outcomes
- Established UI/UX design system and component library to ensure consistency across the entire SaaS platform
- Translated complex HR workflows (onboarding, payroll, compliance) into intuitive user flows, reducing friction for non-technical users
- Collaborated across product, engineering, and business stakeholders to align design decisions with technical constraints and GTM strategy

ION Mobility April 2023 - October 2023
UI/UX Designer/Researcher

- Conducted on-site generative user research at Indonesia BSD to uncover unmet user needs and map end-to-end customer journeys
- Translated research insights into actionable UX proposals and digital API framework recommendations to improve mobile app experience
- Designed and implemented a cohesive UI design system adopted across the organisation's full product suite, ensuring visual and interaction consistency

Aureus Group Pte Ltd February 2022 - April 2023
UI/UX Designer

- Conducted comprehensive product research and developed user stories to guide design decisions for new product release
- Designed and validated product feature logic end-to-end, ensuring functionality mapped accurately to real user needs before handoff to engineering
