KEY COMPETENCIES

Product Design (Figma)	AI Automation & Workflows	Technical Collaboration
UX Research	Team Building & hiring	Product Strategy

PROFESSIONAL EXPERIENCES

PSYKHE Pte Ltd May 2026 - Present
Product Design Consultant

- Designed 2 DBS mortgage lending modules serving 3 operational user groups, delivering high-fidelity UI and prototypes where only wireframes were scoped, to full sign-off in 3 months
- Negotiated 5 UI patterns through enterprise design system governance, including configurable table columns that removed horizontal scroll from high-density case lists
- Redesigned OCR verification into a single side-by-side view, cutting document checks from 2 screens to 1 and replacing field-by-field comparison across 4 legacy systems
- Automated manual delivery processes with internal AI workflows and ran a 3-session AI enablement programme for the team

Kelick Pte Ltd September 2024 - October 2025
Product Designer & Manager

- Led full product redesign from concept to MVP, owning end-to-end UX — from user research and wireframing to final UI implementation
- Designed product experience that acquired 5+ paying B2B customers and drove ~$10K MRR, validating design decisions through real revenue outcomes
- Established UI/UX design system and component library to ensure consistency across the entire SaaS platform

- Translated complex HR workflows (onboarding, payroll, compliance) into intuitive user flows, reducing friction for non-technical users
- Collaborated across product, engineering, and business stakeholders to align design decisions with technical constraints and GTM strategy

ION Mobility Pte Ltd April 2023 - October 2023
UI/UX Designer/Researcher

- Conducted on-site generative user research at Indonesia BSD to uncover unmet user needs and map end-to-end customer journeys
- Translated research insights into actionable UX proposals and digital API framework recommendations to improve mobile app experience
- Designed and implemented a cohesive UI design system adopted across the organisation's full product suite, ensuring visual and interaction consistency

Aureus Group Pte Ltd February 2022 - April 2023
UI/UX Designer

- Conducted comprehensive product research and developed user stories to guide design decisions for new product release
- Designed and validated product feature logic end-to-end, ensuring functionality mapped accurately to real user needs before handoff to engineering
